EDUCATION

B.Tech in Artificial Intelligence and Machine Learning 2021 – 2025
Karunya Institute of Technology and Sciences, Coimbatore

Higher Secondary Education 2009 – 2021
S.B.O.A. Matriculation Hr. Sec. School, Madurai

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, Angular, React.js, React Native

Backend: Python, Django, Flask, Node.js, Express.js, PHP (Laravel), .NET

Databases: MySQL, PostgreSQL, SQLite

Tools & Technologies: Git, REST APIs, MVC, VS Code, Pandas, Numpy, Docker, Kubernetes

Soft Skills: Teamwork, Leadership, Communication, Problem Solving, Time Management

PROFESSIONAL EXPERIENCE

Full Stack Developer – Justo Global Jul 2025 – Present

- Independently undertook and delivered a client project end-to-end — an HR and Payroll portal built with proper authentication, roles, and permissions.
- Learned Angular and the .NET framework while building the portal, expanding full-stack capabilities beyond the React/Node.js stack used during the internship.

Full Stack Developer Intern – Justo Global Jan 2025 – Jun 2025

- Expedited code deployments for FMPB web app by 40% by automating testing and streamlining CI/CD pipelines, reducing debugging time, and allowing faster feature releases.
- Built and deployed 3+ cross-platform applications using React and React Native, serving more than 500+ test users.
- Collaborated with back-end and QA teams to reduce integration bugs by 40% through improved API consistency.

Software Developer Intern – MAS Apparel, Jordan Jul 2024 – Sep 2024

- Automated Nike's service tracking system using PHP and Laravel, reducing manual work by 70%.
- Improved reporting accuracy by 25% by integrating real-time status updates into dashboards.

Software Developer – Dedan Kimathi University, Kenya May 2024 – Jul 2024

- Created a college portal with user roles (students, faculty, HoDs), enabling access for 100+ users.
- Reduced processing time for forms by 50% through optimized back-end workflows in Python.

Full Stack Developer – Ernst & Young Global Ltd. Jan 2024 – Mar 2024

- Delivered 2 full-stack academic projects using Django, HTML/CSS, and PostgreSQL for university clients.
- Reduced project delivery time by 15% through modular code reuse and agile collaboration.

Programming Intern – CISCO Networking Academy Apr 2022 – Jun 2022

- Developed a Python-based IP address validator that reduced network configuration errors by 60%.
- Presented code in a final showcase, earning recognition for clarity and modularity.

PROJECTS

Pneumonia Detector (ML) Used CNN to detect pneumonia from X-ray images using Python and TensorFlow.

Movie Recommendation System (ML) Built a collaborative filtering model to suggest personalized movies.

Hotel Reservation System Python-based booking system with dynamic availability.

Webcam Motion Detector Python app that detects movement and emails snapshots using OpenCV.

CERTIFICATIONS AND COURSES

- Google IT Automation with Python
- Machine Learning (Coursera), Pandas, Data Cleaning, Data Visualization
- NPTEL Technical English for Engineers

LANGUAGES

English (Fluent), Tamil (Native), French (Intermediate), Malayalam (Conversational)
